PROFILE

Highly motivated final-year Software Engineering student eager to gain professional experience and develop new skills, with a strong interest in computer networks. A proactive problem-solver with excellent communication skills, dedicated to teamwork and continuous professional growth in a dynamic environment.

EXPERIENCE

Mentorship in programming (ZIRA Talent Academy)

Remote | February 2024 – May 2024

This mentoring experience significantly improved my understanding of the software development process and further developed my ability to think analytically and solve problems through practical tasks and technical discussions from a real environment. With the mentorship of an experienced senior software engineer, I gained practical knowledge and experience in the field of software development such as:

- Problem solving & debugging
- OOP principles
- Clean Code, design patterns and similar principles
- Different coding tasks and discussions

Mobile shop assistant (Mobitel Studio Group doo)

Živinice | April 2023 – September 2023

- Providing basic technical support
- Configuring devices and setting up systems
- Handling cash register and transactions
- Maintaining the store and inventory

Self – Initiated Projects

IoT smart safe - Development of an IoT simulation of a smart safe that enables remote control, generation of security codes and monitoring of device status in real time.

AquaControl - AquaControl is a desktop application intended for recording water consumption and billing.

It enables easy management of the user base, entry of monthly consumption, automatic calculation of bills according to the tariff, and monitoring of payments and debts.
